Senior Salesforce software developer - Role & Responsibilities

About Mark Spain Real Estate:

Higher Tech Realty LLC DBA Mark Spain Real Estate seeks Senior Salesforce Software Developer in Alpharetta, GA.

Mark Spain Real Estate (MSRE) is a private equity-backed residential real estate brokerage helping families buy and sell homes. MSRE is the #1 real estate team in the industry for client satisfaction, with over 10,000 5-star reviews. The brokerage serves over 10,000 families a year and closes billions of dollars of real estate transactions annually. MSRE specializes in offering homeowners several selling programs, including getting the best possible guaranteed offer for qualified clients. Technology at MSRE plays a key role in the customer experience and in creating leverage for growth.

About this role:

We are seeking a senior Salesforce software developer to join our team at Mark Spain Real Estate. You will be involved in all aspects of the software development life-cycle: ideation with stakeholders, project/feature backlog prioritization, requirement scoping, and development through testing, release and support for products serving our users.

Responsibilities:

Collaborate with Salesforce Business Analysts and System administrators to validate business requirements and any considerations. Lead team of Junior Developers and System Administrators. Take ownership of release cycles to implement and deploy new/updates to existing applications and code. Responsible for designing and developing solutions on the Salesforce platform to improve user experience and scale operations. This involves creating, testing, maintaining and enhancing apex language. Responsible for leading projects such as implementations and integrations of external API's. Maintain enterprise-level CRM implementations. Perform development, testing, implementations and other tasks related to integrated applications. Evaluate project criteria, scoping of projects and completion of project requests. Perform regular monitoring of production systems.

Knowledge, skills and experience to be successful in this role:

- The position requires a Master's degree in Management or related field plus
- Three (3) years of experience in a related technical occupation. Experience must include any amount of experience in ALL of the following skills: Salesforce architecture, design

principles, Visualforce, APEX, Force.com, Java, HTML, SOQL, ETL Tools, REST API Integrations, SOAP, Lightning Components, XML, JSON, CSV, Fixed Files, Sales Cloud, Service Cloud, Marketing Cloud, DocuSign, and Field Service Lightning.

Offered Wage: $110,000 per year
